# P16mm Portable cabinets solution

## 5. Technical Specifications Led Display System, pitch 10mm Indoor

Serial Number	Specification	PH10 outdoor real
1	Pitch	10 mm real pixel RGB
2	Module Resolution	16×16= (dot)
3	Module Size	160mm*160mm (16x16 dots)
4	Module Quantity/cabinet	16
5	Cabinet Size	640x640mm
6	Resolution/cabinet	64×64(dot)
7	Density	10000dots/m <sup>2</sup>
9	LED Standard	RGB real pixel
10	Viewing Angle (H/V)	H: ±150°V:±120°
11	Brightness	≥6000CD/s.q.m
12	The Optimal viewing distance	8—100m
13	Display Colors	687(million)
14	Pixel configuration	1R1G1B
15	Protection Degree	(IP65)
16	Power	(Max.Consumption):500 W/s.q.m (Average Power): 300 W/s.q.m
17	Control mode	Video Sync
18	Display Mode	640×480/800×600/1024×768
19	LED Parametres	(R):λd (619~624nm)IV: (200~260mcd) (G):λd (520~524.5nm)IV: (524~685mcd) (B):λd (468.5~472.5nm)IV: (176~215mcd)
20	Rate	≥180Hz
21	Communication	1000M Cats(≤120M)/Fiber optical (10.000m)

## Other Parameters

Contents	Detail
Viewing angle	Horizontal:110 degree;Vertical:75degree
Color display	10.7billion
Driving Method	1/4 Static,Constant current
Driving Method	1/4 Static,Constant current
Refresh frequency	480HZ
Input signal	RF,S-VIDEO,rgb,RGBTV,YUT ,YC,COMPOSITION
Working environment	Temperature-20 C~ +60 C; Humidity:10%~95%
Input Voltage	AC110V/60HZ;AC220V/50HZ optional

# Technical Support

- LED screen is made of led bricks which are available all the time at all the locations, any problem in bricks will be replaced immediate.
- Zone wise we are based in Delhi, Mumbai, Bangalore, Kolkata, Ahmedabad, Indore, Chandigarh and Ranchi
- We ensure the after sale services with in 24-48 hours in case of none city and 24 hours in same city.
- LED screen can be design in any size any dimension as per the clientele requirement we provides the 2 time led design adjustment after installation for free.

# Key Features and Advantages

1. As 2R-1G-1B LED, more colorful than ordinary LED displays enabling them to show high frequency dynamic images.
2. The brightness is higher because of advantage from its built-in reflection cavity.
3. Viewing angle is available up to 160 degrees; the showing contents won't be disordered.
4. Integrated and modularized design, reasonable layout, is the best advantage for heat dissipation.
5. Our LED screen is controlled by instant current and high gray degree technology, so it is long lifespan, rich color and uniform light.
6. It's high guaranteed for good quality produced by high speed auto mount machine.
7. Simple and light frame is easy for installation

note- p 16 mm Led Display picture of the rental services to various clients are . attached in our project Details, please have a glance

# Control Units

1. Controllers are compatible for any of the input like VGA, DVI, All video supportable and live performance as well with coordination with video production team.
2. Our Switcher can accept the input (any Source ) for data and video Display on Screens.
3. The cabling and Control Panel set up will be based on onsite location analysis.
4. We provide controller in 3 user applications
  1. Sending card
  2. Asynchronies USB control card
  3. Video processor
